<p>Division</p> <p>÷</p> <p><i>Halve Divide Share Groups of Lots of Factor</i></p>	<p>Sharing out real objects in to groups.</p> 	<p>Sharing out real objects in to groups including the concept of remainders as ones 'left over'.</p> <p>$9 \div 2 =$</p> 	<p>Repeated subtraction including remainders.</p>  <p>$9 \div 3 = 3$</p> <p>Using number lines to count in groups.</p> <p>$28 \div 4 = 7$</p> 	<p>Making links to times tables facts.</p> <p>Using number lines to count in larger groups.</p> 	<p>Short division up to 3 digits by 1 digit (including concrete and pictorial)</p>	<p>Short division</p> <p>Up to 4 digit by 1 digit including remainders.</p> <p>Long division</p> <p>Up to 4 digit by 2 digit. (Support using place value counters)</p>						

N.B. Please note that children should be moved on to the next stage in the calculations whenever ready. Children who are secure in a particular calculation method should be taught the next stage regardless of year group. Similarly, children who are struggling at a particular stage may need to revisit the stage before to help secure the earlier method first. The methods above are not exhaustive and other methods may be used if and when appropriate. **Please refer to supporting document 'White Rose Calculation Support' and 'White Rose Curriculum Guidance' for calculation progression using concrete, pictorial and abstract methods.**
