

## Progression of Computing & ICT Skills

SKILL	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Computer science	<ul style="list-style-type: none"> <li>- physically follow and give each other instructions to move around</li> <li>- explore outcomes when buttons are pressed in sequences on a robot</li> <li>- begin to identify an algorithm to achieve a specific purpose</li> <li>- execute a program on a floor robot to achieve an algorithm</li> <li>- begin to predict what will happen for a short sequence of instructions in a program</li> <li>- begin to use software to create movement and patterns on a screen</li> <li>- use the word debug to correct any mistakes when programming a floor robot</li> </ul>	<ul style="list-style-type: none"> <li>- physically follow and give each other forward, backward and turn (right-angle) instructions</li> <li>- articulate an algorithm to achieve a purpose</li> <li>- plan and enter a sequence of instructions to achieve an algorithm, with a robot specifying distance and turn</li> <li>- predict what will happen and test results,</li> <li>- explore outcomes when giving instructions in a simple Logo program</li> <li>- watch a Logo program execute using 'allow programming' in 2Go, debug any problems</li> <li>- talk about similarities and differences between floor robots and logo on screen</li> </ul>	<ul style="list-style-type: none"> <li>- plan and enter a sequence of instructions on a robot specifying distance and turn to achieve specific outcomes, debug the sequence where necessary</li> <li>- test and improve/debug programmed sequences</li> <li>- begin to type logo commands to achieve outcomes</li> <li>- explore outcomes when giving sequences of instructions in Logo software</li> <li>- use repeat to achieve solutions to tasks</li> <li>- solve open-ended problems with a floor robot and Logo including creating simple regular polygons, making sounds and planning movements such as a dance</li> <li>- create an algorithm to tell a joke or a simple story using Scratch or Tynker</li> <li>- sequence pre-written lines of programming into order</li> <li>- talk about algorithms planned by others and identify any problems and the expected outcome</li> </ul>	<ul style="list-style-type: none"> <li>- create and edit procedures typing logo commands including pen up, pen down and changing the trail of the turtle</li> <li>- use sensors to 'trigger' an action such as turning the lights on using Probot if it 'goes through a tunnel', or reversing if it touches something</li> <li>- solve open-ended problems with a floor robot, Logo and other software using efficient procedures to create shapes and letters</li> <li>- experience a variety of resources to extend understanding and knowledge of programming</li> <li>- create an algorithm and a program that will use a simple selection command for a game</li> <li>- begin to correct errors (debug) as they program devices and actions on screen</li> <li>- use an algorithm to sequence more complex programming into order</li> <li>- link the use of algorithms to solve problems to work in Mathematics, Science and DT</li> <li>- identify bugs in programs</li> </ul>	<ul style="list-style-type: none"> <li>- explore procedures using repeat to achieve solutions to problems with Logo and a floor robot</li> <li>- talk about procedures as parts of a program</li> <li>- refine procedures to improve efficiency</li> <li>- use a variable to replace the length of side and the angle of a regular shape</li> <li>- explore instructions to control software or hardware with an input and using if... then... commands</li> <li>- explore a computer model to control a physical system</li> <li>- change inputs on a model to achieve different outputs</li> <li>- refine and extend a program</li> <li>- identify difficulties and articulate a solution for errors in a program</li> <li>- write down the steps required (an algorithm) to achieve the outcome that is wanted and refer to this when programming</li> </ul>	<ul style="list-style-type: none"> <li>- record in some detail the steps (the algorithm) required to achieve an outcome and refer to this when programming</li> <li>- predict the outputs for the steps in an algorithm</li> <li>- increase confidence in the process to plan, program, test and review a program</li> <li>- write a program which follows an algorithm to solve a problem for a floor robot or other model</li> <li>- write a program which follows an algorithm to achieve a planned outcome for appropriate programming software</li> <li>- group commands as a procedure to achieve a specific outcome within a program</li> <li>- control on screen mimics and physical devices using one or more input and predict the outputs</li> <li>- understand how sensors can be used to measure input in order to activate a procedure or sequence and talk about applications in society</li> <li>- create variables to provide a score or trigger an action in a game</li> <li>- link errors in a program to problems in the original algorithm</li> </ul>

## Progression of Computing & ICT Skills

SKILL	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Information Technology	<ul style="list-style-type: none"> <li>- Contribute to and interpret a pictogram.</li> <li>- Take photographs, video and record sound to record learning experiences.</li> <li>- Look at how data is representing digitally.</li> <li>- Use paint programs to create pictures.</li> <li>- Add text and images to a template document using an image and word bank.</li> <li>- Record their own voices and play back to an audience.</li> <li>- Use a video or stills camera to record an activity.</li> <li>- Create sounds and simple music phrases using ICT tools.</li> <li>- Use index fingers (left and right hand) on a keyboard to build words and sentences.</li> <li>- Know when and how to use the SPACE BAR (thumbs) to make spaces between words.</li> <li>- Explore simple information sources including age appropriate websites.</li> </ul>	<ul style="list-style-type: none"> <li>- Ask questions and consider how they will collect information.</li> <li>- Collect data, generate graphs and charts to find answers.</li> <li>- Save and retrieve the data to show to others.</li> <li>- Create paper/object decision trees and explore a branching database.</li> <li>- Take and save photographs, video and record sound to capture learning. Use microscopes or other devices to capture and save magnified images.</li> <li>- Investigate different types of digital data e.g. online encyclopedias.</li> <li>Use an increasing variety of tools and effects in paint programs and talk about their choices.</li> <li>- Create own documents, adding text and images.</li> <li>- Use templates to make electronic books individually and in pairs.</li> <li>- Explore the effects of sound and music in animation and video.</li> <li>- Use keyboard to enter text</li> <li>- Know when and how to use the RETURN/ENTER key.</li> <li>- Use SHIFT and CAPS LOCK to enter capital letters.</li> </ul>	<ul style="list-style-type: none"> <li>- Find out information from a pre-prepared database, asking straightforward questions.</li> <li>- Contribute towards a database.</li> <li>- Construct and use a branching database.</li> <li>- Record data in a variety of ways. Present data for others.</li> <li>- Use a data logger to monitor changes and talk about the outcomes seen</li> <li>- Explore and begin to evaluate the use of multimedia (photos, video and sound) to enhance communication</li> <li>- Create and begin to edit text and presentation documents, experimenting with fonts, size, colour, alignment for emphasis and effect.</li> <li>- Use a range of effects in art programs including brush sizes, repeats, reflections</li> <li>- Explore the use of video, animation, and greenscreening.</li> <li>- Use ICT tools to create musical phrases.</li> <li>- Amend text and save changes.</li> <li>- Use individual fingers to input text and use SHIFT key to type characters.</li> <li>- Amend text by highlighting and using</li> </ul>	<ul style="list-style-type: none"> <li>- Plan and create a database to answer questions.</li> <li>- Identify different types of data.</li> <li>- Ask questions carrying out simple searches on a database.</li> <li>- Identify inaccurate data.</li> <li>- Present data in appropriate format for an audience.</li> <li>- Use a data logger to record and compare individual readings</li> <li>- Explore how multimedia (photos, video and sound) can create atmosphere and appeal to different audiences</li> <li>- Be confident in creating and modifying text and presentation documents to achieve a specific purpose</li> <li>- Use art programs and online tools to modify photos for a specific purpose using a range of effects</li> <li>- Explore the use of video, animation, and greenscreening for a specific audience.</li> <li>- Use ICT tools to create music phrases for a specific purpose</li> <li>- Use a keyboard effectively, including the use of keyboard shortcuts</li> <li>- Use font sizes and effects such as bullet points appropriately.</li> </ul>	<ul style="list-style-type: none"> <li>- Collect and record information using spreadsheets and databases</li> <li>- Carry out complex searches (e.g. using and/or; <math>\leq</math> / <math>\geq</math>)</li> <li>- Solve problems and present answers using data tools.</li> <li>- Analyse information and question data.</li> <li>- Identify poor quality data.</li> <li>- Select appropriate use of a data logger for an investigation and interpret the findings</li> <li>- Select an appropriate ICT or online tool to create and share ideas.</li> <li>- Explore the effects of multimedia (photos, video, sound) in a presentation or video and show how they can be modified.</li> <li>- Develop skills using transitions and hyperlinks to enhance the structure of presentations.</li> <li>- Use a wide range of effects in art programs and online tools, discussing the choices made and their effectiveness.</li> <li>- Know how to use text and video editing tools in programs to refine their work.</li> <li>- Use online tools to create and share presentations and films.</li> </ul>	<ul style="list-style-type: none"> <li>- Use the whole data process – generate, process, interpret, store, and present information – realising the need for accuracy and checking plausibility.</li> <li>- Select appropriate data tool.</li> <li>- Identify and present results.</li> <li>- Interrogate a database, refining searches to provide answers to questions.</li> <li>- Plan investigations using the outcomes from a data logger to show findings</li> <li>- Identify the purpose for selecting an appropriate online tool.</li> <li>- Discuss audience, atmosphere and structure of a presentation or video.</li> <li>- Collect information and media from a range of sources (considering copyright issues) into a presentation for a specific audience.</li> <li>- Use sound, images, text, transitions, hyperlinks and HTML code effectively in presentations.</li> <li>- Store presentations and videos online where they can be accessed by themselves and shared with others.</li> <li>- Evaluate the effectiveness of their own</li> </ul>

## Progression of Computing & ICT Skills

		<ul style="list-style-type: none"><li>- Use DELETE and BACKSPACE buttons to correct text.</li><li>- Create sentences, SAVE and edit them later.</li><li>- Find information from a technology based resource such as the Internet, DVD or files on the public drive and talk about the differences and who the information belongs to.</li><li>- Talk about whether information is true or not</li></ul>	<p>SELECT/DELETE and COPY/PASTE.</p> <ul style="list-style-type: none"><li>- Look at own work and consider how it can be improved for effectiveness.</li><li>- Save work on the school network, on the Internet and on individual devices</li><li>- Talk about the parts of a computer.</li><li>- Use simple search tools and find appropriate websites.</li></ul>	<ul style="list-style-type: none"><li>- Know how to use a spellcheck.</li><li>- Look at their own, and a friend's work and provide feedback that is constructive and specific.</li><li>- Frame questions and identify key words to search for information on the Internet.</li><li>- Consider reliability of information and ways it may influence you.</li></ul>	<ul style="list-style-type: none"><li>- Identify different parts of computing devices.</li><li>- Use effective strategies to search with appropriate search engines.</li></ul>	<p>work and the work of others.</p> <ul style="list-style-type: none"><li>- Describe different parts of a computing device and how it connects to the Internet. Connect a computing device to a keyboard, mouse or printer.</li><li>- Use search engines as part of an effective research strategy.</li><li>- Describe how search results are selected and ranked.</li></ul>
--	--	---	--	---	--	--

## Progression of Computing & ICT Skills

<p>Digital literacy - e-safety</p>	<ul style="list-style-type: none"> <li>- Agree sensible e-safety rules for the classroom.</li> <li>- Use a selection of websites and consider who can see the information online.</li> <li>- Play appropriate games on the internet, including games against real people.</li> <li>- Talk about how adults can help us, including when we see something we don't like or something makes us feel uncomfortable.</li> <li>- Play games that reinforce the idea of personal information, including password privacy.</li> <li>- Identify the purposes for using technology in the classroom, at home and in the world around.</li> </ul>		<ul style="list-style-type: none"> <li>- Agree sensible e-safety rules for the classroom.</li> <li>- Choose a secure password for age-appropriate websites.</li> <li>- Discuss what actions could be taken if they are uncomfortable or upset online e.g. Report Abuse button.</li> <li>- Talk about what games they enjoying playing and what good choices are when playing games e.g. content, screen time.</li> <li>- Use a class blog to share information and talk about who can see it, and how to communicate safely and respectfully</li> <li>- Comment and provide positive feedback on the work of classmates in school or online, or the work of others online.</li> </ul>		<ul style="list-style-type: none"> <li>- Agree sensible e-safety rules for the classroom.</li> <li>- Discuss their own personal use of the Internet and choices they make including excessive use, personal information and password security,</li> <li>- Discuss how to protect devices from virus threats.</li> <li>- Discuss the importance of keeping an adult informed about what you're doing online, and how to report concerns.</li> <li>- Explore using the safe and responsible use of online communication tools e.g. blogs, messaging.</li> </ul>	
<p>Digital literacy - technology in our lives</p>	<ul style="list-style-type: none"> <li>- Identify uses of technology in the classroom, at home and in the local area.</li> <li>- Talk about using the Internet and using resources on the local device.</li> </ul>	<ul style="list-style-type: none"> <li>- Identify the purposes for using technology in the classroom, at home and in the world around.</li> </ul>	<ul style="list-style-type: none"> <li>- Save work on the school network, on the Internet and on individual devices</li> <li>- Talk about the parts of a computer.</li> <li>- Use appropriate tools to collaborate on-line.</li> <li>- Use appropriate tools to communicate on-line.</li> <li>- Talk about the owner of information online.</li> </ul>	<ul style="list-style-type: none"> <li>- Talk about the school network and the different resources they can access, including the Internet.</li> <li>- Check who the owner is before copying photos, clipart or text.</li> </ul>	<ul style="list-style-type: none"> <li>- Identify different parts of the Internet.</li> <li>- Choose appropriate tools for communication and collaboration and use them responsibly.</li> <li>- Talk about the different elements on webpages.</li> <li>- Find out who the information presented on a webpage belongs to.</li> </ul>	<ul style="list-style-type: none"> <li>- Describe different services provided by the Internet and how information moves around the Internet.</li> <li>- Identify appropriate forms of online communication for different audiences.</li> <li>- Acknowledge who resources belong to that have been found on the internet.</li> </ul>
